5 ABSTRACT

10 A method that includes but is not limited to accepting user  
input specifying a geometrical arrangement of two or more buttons on  
one or more displayed pages; accepting user input labeling at least  
two of the two or more buttons on the one or more displayed pages;  
15 accepting user input defining at least one interaction between the  
labeled at least two buttons; accepting user input specifying at  
least one constraint cost for the defined at least one interaction;  
and assigning the labels of the at least two buttons among the two or  
more buttons on one or more displayed pages such that the at least  
20 one constraint cost is substantially optimized. In addition to the  
foregoing, other method embodiments are described in the claims,  
drawings, and text forming a part of the present application. In one  
or more various embodiments, related systems include but are not  
limited to circuitry and/or programming for effecting the  
foregoing-described method embodiments; the circuitry and/or  
programming can be virtually any combination of hardware, software,  
and/or firmware configured to effect the foregoing-described method  
embodiments depending upon the design choices of the system
